

Press Release

Embraer has become one of the fastest growing aircraft manufacturers in the world by focusing on specific market segments with high potential in commercial, defense, and executive aviation. They develop and adapt successful aircraft platforms and judiciously introduce new technology whenever it creates value by lowering acquisition price, reducing direct operating costs, or delivering higher reliability, comfort, and safety.

As a result, the aircraft provide excellent performance with day-in and day-out reliability, while being economical to acquire and cost-effective to operate and maintain. Equally important, Embraer provides a superior product package, with comprehensive aircraft and after-sales support for parts, services, and technical assistance.

Especially for this after-sales support, Embraer has selected the Interturbine Group of Companies as its preferred source for chemicals and consumable materials.

We are recognized around the world as an approved supplier of chemicals, consumable materials, composites, raw and semi-finished materials to the aerospace industry and airlines. We hold approvals of Airbus, ATR, Avcraft and Eurocopter due to the high service attitude of our staff, fast response, global presence and world-wide material handling capability.

Our innovative material service support concept provides a One-Stop-Source with customer service centres around the world.

Our service makes the difference:

- AOG support - 24/7 - 365 days a year
- Initial provisioning
- Inventory management
- Just in time material supply
- Total supply chain management
- One Stop Source service for all maintenance materials
- Inhouse forwarder to reduce shipping time and cost
- Shipping consolidation of various products
- Dangerous goods packing
- Dry-ice composites shipping
- Service bulletin and repair kit assembly
- Component repair and overhaul management
- Supply of common and specific aircraft tooling and GSE
